Information security at MAHA

TISAX® assessment successfully completed

- **By completing the TISAX assessment, MAHA has confirmed its successful participation in the automotive industry's recognised assessment and exchange mechanism for information security and the protection of sensitive data. This establishes a uniform standard and reinforces trust.**

Haldenwang, 18th December 2025. MAHA SE & Co. KG has successfully completed the TISAX assessment, demonstrating its high standards in protecting confidential data. TISAX stands for Trusted Information Security Assessment Exchange and is an assessment and exchange-based procedure used by the automotive industry, in which processes, workflows and technical structures are scrutinised in detail. Assessments are conducted based on the Information Security Assessment questionnaire from the German Association of the Automotive Industry (VDA ISA). Through its participation, MAHA is reinforcing its dependability as a partner and providing measurable security in collaboration – today and in the future.

For customers and partners, this essentially means: information protection at the highest level – from prototype and project environments, through to connected supply chains. This enhances the efficiency of collaboration, reduces risks and ensures that compliance requirements are reliably met. TISAX assessment results are accessible exclusively using the specially developed online platform and are only available to registered TISAX participants. Companies can opt to share their results with business partners, enabling reciprocal exchange.

'The assessment was demanding, but has significantly advanced us both as a team and as a company. By taking part, we're demonstrating that MAHA meets the stringent requirements our customers expect us to adhere to and is a reliable partner in the industry. We're particularly proud of this achievement,' commented Roy Lazonby (Head of IT and TISAX Project Manager at MAHA).

About TISAX®

On behalf of the VDA, the ENX Association supports the mutual recognition of information security assessments in the automotive industry through TISAX (Trusted Information Security Assessment Exchange). TISAX assessments are conducted by TISAX audit providers who regularly demonstrate their qualifications. The results of TISAX assessments are not publicly available. TISAX is a registered trademark of the ENX Association.
