VEHICLE TESTING TECHNOLOGY
SIDE-SLIP TESTER

C_MINC 18.0
VP 420011

C_MINC 18.0
VP 420011

The side-slip tester MINC-PROFI ensures that the axle geometry is inspected within seconds once the test vehicle passes over it as well as a fully automatic evaluation of the deviation in m/km. The display of the measured values is via the web client of the CONNECT series.

PRODUCT DETAILS/ACCESSORIES

Description:
Side-slip tester, checks the axle geometry within seconds while passed over by vehicle up to 18 t axle load

Specially suitable for truck diagnostic and PTI test lanes, also for higher vehicle throughput

Fully automaticevaluation of deviation in m/km

In combination with CONNECT Web client:
Automatic display on respective terminal device

(smart device, PC,) when vehicle drives onto tester, including evaluation in m/km

Design:
- Side-slip tester C_MINC 18.0
- Self-supporting frame with movable test plate incl. vulcanised rubber pad
- High-quality powder coating: anthracite grey, RAL 7016

Scope of delivery:
- Side-slip tester C_MINC 18.0 floor assembly
- Prepared for connectionto CONNECT test lane

TECHNICAL DATA

Axle load	18000 kg
Measurement range	+/- 20 m/km
Test speed	5 - 7 km/h
Floor assembly dimensions (H x W x L)	135 x 770 x 1020 mm

ACCESSORIES

VZ 935307	Cable harness extension 10 m for C_MINC series

SUPPLEMENTARY CHARGES

VT 998267	Internal transport -SOUTHSide-slip tester Truck
VT 998268	Internal transport -NORTHSide-slip tester Truck
VM 996091	Installation costs incl. instruction and calibration MINC up to 18 t axle load
