

VEHICLE TESTING TECHNOLOGY SIDE-SLIP TESTER

MINC II EURO
VP 420005

MINC II EURO
VP 420005

The side-slip tester MINC II EURO ensures that the axle geometry is inspected within seconds once the test vehicle passes over it (up to 15.0 t axle load) as well as a fully automatic evaluation of the deviation in m/km. The display of the measurement values is either analogue via dial or via transmission to a PC screen (including graphic display).
